

## System INFO

### FS 55 Final Trimming Knife

[www.gotschild.de](http://www.gotschild.de)

The **Gottschild-System FS 55 Final Trimming Knife** is the optimal handheld trimming blade for trimming PVC overhang from 3D furniture components.

#### Advantages

The **FS 55** Final Trimming Knife is user-friendly and gives perfect results in the final trimming step. The blade is set at a 15° angle so that no sharp edges remain after trimming. The support base has a 55mm diameter that ensures smooth handling. The special finish on the underside allows the tool to slide easily over the backside of the laminated component without marring the surface.

We designed the knife head so that the blades are easy to change. Commercially available replacement knives keep maintenance costs low.

The **FS 55** is also the optimal handheld knife for use with a flipper.
